NATURE'S FREAKS.

The Devil's Pump to California and Mo-

One of the greatest combinations of natural and artificial curiosities on the coast of California is called the Devil's

Pump. The pholas, or shell miners,

species of mollusk which excavate im-mense caverns in the very hardest

cal opening some distance from the

water's edge. It is estimated that this hole, which connects with the sea cay-

ern, is seventy-five to one hundred feet

into the cavern beneath, the "pump"

throws water to the height of a full one hundred feet above the mouth of the

opening. The Indians formerly called

It by a name ,which signified "fairy
